

## Symbolic Dynamics and Hyperbolic Groups

By Michel Coornaert

Springer. Paperback. Book Condition: New. Paperback. 140 pages. Dimensions: 9.1in. x 6.1in. x 0.5in. Gromov's theory of hyperbolic groups has had a big impact in combinatorial group theory and has deep connections with many branches of mathematics such as differential geometry, representation theory, ergodic theory and dynamical systems. This book is an elaboration on some ideas of Gromov on hyperbolic spaces and hyperbolic groups in relation with symbolic dynamics. Particular attention is paid to the dynamical system defined by the action of a hyperbolic group on its boundary. The boundary is most often chaotic both as a topological space and as a dynamical system, and a description of this boundary and the action is given in terms of subshifts of finite type. The book is self-contained and includes two introductory chapters, one on Gromov's hyperbolic geometry and the other one on symbolic dynamics. It is intended for students and researchers in geometry and in dynamical systems, and can be used as the basis for a graduate course on these subjects. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

### Reviews

*A superior quality ebook and also the font used was interesting to read through. This is for all who state there was not a well worth reading. I discovered this publication from my dad and i encouraged this pdf to learn.*

-- **Felix Lehner Jr.**

*Here is the best ebook i actually have go through until now. It really is simplistic but shocks within the fifty percent in the ebook. Your daily life period will probably be transform once you total reading this book.*
