Brand New Book ***** Print on Demand *****.Excerpt from Diseases of the Thyroid Gland It is a new departure for the small country hospital to present to the profession the result of studies of any particular disease. The disadvantages detached workers labor under are many, but the advantages also are worth noting. The isolation makes the investigators more free to follow their own ideas uninfluenced by the opinion of associates. The small country hospital drawing its patrons from the immediate community is better able to study the end results. It is only by frequent examination of the patient that one can obtain an accurate idea of the subsequent course in disease of the thyroid gland. The material obtained at operations has been carefully studied and compared with the clinical history. Each time information has been obtained as to the subsequent course of the disease the specimen and slide have been re-examined and compared with the sum total of information available to date. This study has brought convincing evidence that the activity of the interstitial cells is associated with a definite clinical type of thyroid...
