

ASP.NET 3.5 Application Architecture and Design: Build robust, scalable ASP.NET applications quickly and easily

By Vivek Thakur

Shroff Publishers/Packt, 2008. Softcover. Book Condition: New. 18 x 22 cm. Application architecture is an essential skill for ASP NET developers. It is always tempting to jump in and start coding, but planning your architecture early in the project will leave you with a solid application that scales well, is easy to modify and extend, and saves you time and effort later on. As businesses struggle to control their costs, writing solid code that can be extended easily is becoming even more important. This book takes a pragmatic approach to Application Architecture in ASP NET 3.5. It presents a series of common architectural models, and shows how to select the best ones for your project and apply them. The book begins by showing you how to use the main architectural models in your applications. You will see how to implement n-tier architectures, MVC, design patterns, and more. But this is no software engineering theory book ? it is a practical, hands-on guide that shows you how to use these techniques in your software straight away. We then go on to build SOA (Service-Oriented Architecture) applications with the Windows Communication Framework (WCF). Finally the book contains some essential guidance on effective...
